Calamba, Misamis Occidental, Philippines

OBJECTIVE

Highly motivated software developer with hands-on experience in software development gained through intensive self-study and project-based learning. Seeking a full-time opportunity to contribute my technical skills and gain practical experience in a dynamic team environment.

PROJECTS

JOBTY - command line interface for tracking job applications

[Live URL](#) | [Source Code](#)

Python, Typer, Pydantic, SQLAlchemy, SQLite3

- Developed a CLI for tracking my job applications using Typer, a modern Python library for building CLI applications
- Utilized Pydantic for data validation and serialization
- Used SQLAlchemy for seamless database queries

INVOICY - web application for managing invoices

[Live URL](#) | [Source Code](#)

FastAPI, PostgreSQL, React, TypeScript, Tanstack Router, Tanstack Query

- Developed a full-stack application using FastAPI for the backend service and React for the frontend
- Implemented OAuth2 with password and Bearer with JWT tokens for handling authentication and authorization
- Designed the API to adhere to REST principles
- Deployed the frontend on Vercel and the backend service on an AWS EC2 instance

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS

Frameworks: React.js, Next.js, Express.js, FastAPI, Flask

Databases: PostgreSQL, MongoDB

Developer Tools: Docker

Cloud Computing: AWS

EDUCATION

Mindanao State University – Iligan Institute of Technology

Pursued Bachelor of Science in Computer Science (Incomplete)

Relevant Coursework: *Data Structures, Database Systems, Introduction to Software Engineering*

CERTIFICATIONS

AWS Cloud Technical Essentials

Coursera – Amazon Web Services, February 2026

Relevant Skills: *Cloud Computing, Amazon Elastic Compute Cloud*
